How To Change Manual Transmission Fluid by David & Charles

**How To Change Manual Transmission**

Quick Summary. To drive smoothly with a manual transmission, start by moving the gearstick in between third and fourth gear to put the car into neutral. Next, push your foot all the way down on the clutch, start the car, and push the gearstick into first gear.

The first step is getting your car in the air and sitting level. This lets you access the transmission and insures you'll fill it to the correct level. Next, find the fill plug on the upper portion of the transmission housing and unscrew it. Then, find the drain plug, and undo that to drain the gearbox.

**How and Why to Change Your Manual Transmission Fluid**

How to Replace a Manual Transmission. 8 Remove the shift levers from the side of the transmission. 9 Disconnect the back drive rod from the bell crank. 10 Remove the bolts from the shift control assembly and carefully lower the assembly until the shift lever clears the rubber shift boot. Then remove the assembly from the car.

Other Changes. If the shift mechanism is floor-mounted, you have to either remove the floor panel or cut a hole in the carpet. You have to do the similar things to the column for a column-mounting mechanism. You may also have to replace components like a pump, torque converter, and a few others for the accommodation and smooth functioning of the new gearbox.

**How to change your manual transmission fluid**

Removing a manual transmission from your vehicle is not as difficult as it may seem at first and well worth doing the job yourself. In the beginning, all transmissions were manual. Now transmissions can be manual or automatic; regardless, their function is to take the power that the engine creates to move the car ...
