A Markov chain is a stochastic process with the Markov property. The term "Markov chain" refers to the sequence of random variables such a process moves through, with the Markov property defining serial dependence only between adjacent periods (as in a "chain"). It can thus be used for describing systems that follow a chain of linked events, where what happens next depends only on the current ...

Adams, Frederick Upham Born in Boston, Mass. on 10 December 1859; died at Larchmont, New York on 28 August 1921. In 1892 he published a treatise on atmospheric resistance and its relation to the speed of trains which led the Baltimore & Ohio Railroad to build a prototype which was tested in 1900, but failed to achieve the speeds predicted.

DISCUSSION. The respondents to all three of these studies are clearly U.S. adults who frequently use bicycles for recreation and transportation and who could be called bicyclists rather than just people who occasionally ride a bike. While these results are not representative of the general adult population, they do suggest what adults in this country are capable of.

Adult Bicyclists in the United States
1. Introduction. The growing public awareness about the negative impacts of car-based urban mobility is substantiated on ecological issues (local pollution, global warming, scarcity of resources and so on), public health issues (obesity, cardiac diseases, etc.), monetary issues (growing economic costs of traffic congestion and infrastructures), urban liveability, and land use.

How infrastructure can promote cycling in cities: Lessons ...
County highways engineers in Cumbria say they don't plan to put up a
temporary bridge in Staveley near Kendal, after the existing one was damaged by flooding.
